

**LEVERAGING MACHINE LEARNING FOR EARLY CASE ASSESSMENT****Date:** Wednesday, April 27, 2016**Time:** 11:30 a.m. - 12:30 p.m. Central time**Presenters:** Lanny Morrow & Jeremy Clopton**CPE Credit:** One CPE credit in Specialized Knowledge and Applications field of study may be awarded upon verification of participant attendance.

Legal discovery is one of the costliest aspects of litigation. Early case assessment (ECA) is designed to estimate the risks and costs of pursuing or defending a legal case and could save the parties significant time and money if properly implemented. The ECA process often involves analyzing a massive volume of textual content, such as documents, email and social media. This complimentary webinar will explore the digital forensics and machine learning tools that can significantly speed up the ECA process by mapping out relationships between parties, locating relevant content in documents and identifying and quantifying types of files and areas where evidence could exist.

**Learning Objectives**

Upon completion of this webinar, participants will be able to:

- List data sources relevant in the ECA process and understand how digital forensics can help identify, quantify and preserve them
- Identify less obvious sources of relevant data, such as cloud-based accounting systems, distributed data storage and social media, and how they can affect ECA
- Discuss how machine learning (teachable) software can dramatically reduce time and costs during ECA discovery
- Describe how machine learning tools can help detect obscure relationships between parties and emotional tones in communications and help perform rapid, efficient “find more like this” searches in vast document collections
- Explain how tying these concepts together can give them a competitive advantage in their ECA process that’s not available through traditional methods

**REGISTER****CYBERSECURITY INVESTIGATIONS – PLANNING & BEST PRACTICES****Date:** Wednesday, May 4, 2016**Time:** 11:30 a.m. - 12:30 p.m. Central time**Presenters:** Lanny Morrow, Cy Sturdivant & Michal Ploskonka**CPE Credit:** One CPE credit in Specialized Knowledge and Applications field of study may be awarded upon verification of participant attendance.

In the digital age, security breaches are inevitable, and cyberattacks against businesses and governmental organizations are becoming more frequent and severe. Cybercrime and espionage are costing the U.S. economy billions of dollars, and the threat of cyberattacks is ranked as the No. 1 risk facing U.S. businesses. Join BKD for a complimentary webinar designed to help you prepare for and respond to cybersecurity incidents.

**Learning Objectives**

Upon completion of this webinar, participants will be able to:

- Discuss the historical perspective on cyber threats
- Describe the current cyber threat landscape (top five cybercrimes, recent developments and case studies)
- Recognize the types of data and industries at risk
- Explain the current regulatory environment
- Identify the best practices and available frameworks with regard to cybersecurity preparedness, monitoring and response strategies

**REGISTER****FILTERING THE TAX NOISE: BENCHMARKING CRUCIAL COMPONENTS OF SCHEDULE H & 501(R)****Date:** Wednesday, May 11, 2016**Time:** 2 - 3:30 p.m. Central time**Presenters:** Brian Todd & Mike Engle**CPE Credit:** Up to 1.5 CPE credits in Taxes field of study may be awarded upon verification of participant attendance.

The IRS is increasing its use of data analytics to identify outliers and Form 990 red flags and recently announced additional training programs for approximately 30 agents on Schedule H and IRC Section 501(r). It’s crucial that tax-exempt hospitals have a thorough understanding of the questions on Schedule H and comply with 501(r) regulations. In this complimentary webinar, we’ll take a deep dive into Schedule H, reviewing benchmarking data from more than 2,000 tax-exempt hospitals across the country, identifying potential red flag responses and discussing the schedule questions along with the underlying 501(r) regulations.

**Learning Objectives**

Upon completion of this webinar, participants will be able to:

- Discuss how hospitals across the country have responded to Schedule H questions
- Recognize potential red flag responses to Schedule H questions
- Identify which rules and regulations are prompting the IRS to ask various questions on Schedule H, particularly in Part V, Section B, where the 501(r) questions are located

**REGISTER****THE SCIENCE OF BUSINESS VALUATION****Date:** Wednesday, May 11, 2016**Time:** 11:30 a.m. - 12:30 p.m. Central**Presenter:** Virginia Schnippel**CPE Credit:** One CPE credit in Specialized Knowledge and Applications field of study may be awarded upon verification of participant attendance.

Business valuation procedures have evolved over the years, becoming more of a science. Join us for this complimentary webinar focused on the new technology and resources that have led to modern-day business valuation procedures.

**Learning Objectives**

Upon completion of this webinar, participants will be able to:

- Recognize the amount of third-party research that’s performed and relied upon in a business valuation
- Compare how the development of assumptions used have changed from being mostly appraiser judgment to detailed analytics
- Discuss the importance of providing complete information to the appraiser for development of analysis
